

XpressBizMail - Business Class E-mail Hosting

XpressBizMail Hosted Business Class E-Mail Services allows you to focus on your business rather than worry about your email system. We provide a complete, reliable email solution for just a few rupees per day. We keep your team synched wherever they are without expensive upgrades or complex software management requirements.

Cost-effective Business Mail Server.

Our mail server is a feature-rich Windows mail server that brings the power of enterprise-level functionality and collaboration to businesses and hosting environments, it provides 98% anti-spam, robust anti-virus, detailed reporting and email archiving to name a few.

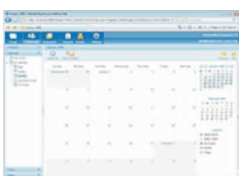

World-class Webmail Interface.

XpressBizMail delivers an industry-leading Webmail interface for accessing email, calendars, contacts, and notes as well as complete server administration. Full collaboration functionality and shared calendars, tasks, notes, and folders are also available, as well as reminders and alerts, bringing the features and performance of a desktop application to the Web.

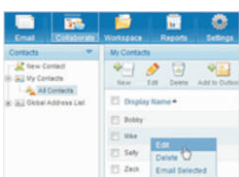

Over-the-Air Synchronization with BlackBerry, iPhone, and Windows Mobile Devices.

XpressBizMail includes the SyncML protocol to achieve over-the-air synchronization of contacts, calendars, tasks, and notes. Users can send and receive e-mail messages directly from their mobile devices. Most devices are supported, including BlackBerry, iPhone, and Windows Mobile devices.

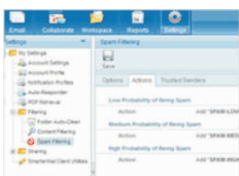

Collaboration for the Office and the Enterprise.

XpressBizMail provides robust collaboration features with folders, calendars, contacts, tasks, and notes which can be fully synchronized with Microsoft Outlook and mobile devices. It is built from the ground up to be a foundation for a complete communications platform.

Complete Synchronization with Microsoft Outlook.

XpressBizMail users have the ability to fully utilize Microsoft Outlook beyond the capabilities of most mail servers. Users can “two-way” sync between the XpressBizMail Web interface and Microsoft Outlook—allowing changes and additions to folders, calendars, contacts, tasks, and notes to be concurrently available in both applications.

Anti-Spam Technologies Included.

XpressBizMail's Anti-Spam technologies allow customized levels of protection with flexible configurations on multiple antispam processes, including SpamAssassin, Greylisting, Sender Policy Framework (SPF), DomainKeys, Custom Headers, Bayesian Filtering, Reverse Domain Name Server (DNS), Real-Time Blacklist (RBL), Blacklist/Whitelist and more!

Business Class E-mail Hosting starting at Rs. 69/- per mailbox per month onwards
